Single Survey

Survey report on:

Property Address	Lochview Knockfarrel Dingwall IV15 9TQ
Customer	James & Denise Williamson
Prepared by	Graham + Sibbald LLP

Date of Inspection 07/01/2025

1. Information and Scope of Inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The property comprises a One and a half storey detached dwelling house
	with single storey side and front projections together with a substantial
	number of outbuildings set in approximately 7.9 acres of surrounding
	garden and croft land.

Accommodation	The accommodation may be summarised as follows:-
	Ground Floor - Entrance Porch, Inner Hall, Living Room with Conservatory off, Shower Room, Kitchen, Side Hallway, 2 Bedrooms (1 with En Suite Bathroom)
	First Floor - Landing with Walk-In Cupboard Off, 2 Bedrooms (1 with En Suite WC).

Gross Internal Floor Area (m²)	125 or thereby

Neighbourhood and Location	The subjects are situated in rural surroundings occupying an elevation position within the Knockfarrel area, approximately 5 miles west of
	Dingwall and 19 miles north of Inverness. Immediate surrounding properties comprise scattered residential dwellings, together with surrounding farmland and countryside. The property enjoys an open outlook to the front towards Loch Ussie and beyond.

Age (Year Built)	1900 fully refurb 2005
Weather	Clear but preceded snow.
Chimney Stacks	There are chimney stacks at the gable elevations of the two storey part of the property of pointed sandstone construction.
	Visually inspected with the aid of binoculars where appropriate.
Roofing including Roof Space	The roof areas are of pitched design, clad with slates and incorporating tiled ridging.
	We would emphasise that our inspection of the roof elevations was greatly restricted due to the presence of snow.
	There was access gained to accessible roof void areas via ceiling hatches within the first floor landing and side hallway. Fibreglass insulation has been laid between the ceiling joists.
	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
Rainwater Fittings	The gutters and downpipes are of both uPVC and cast iron construction.
Kaniwatei rittiilys	
	Visually inspected with the aid of binoculars where appropriate.

Main Walls	The outer walls of the two storey part of the property are of solid sandstone construction and pointed externally.
	The walls to the single storey side projection are understood to be of solid stone construction and rendered externally.
	Visually inspected with the aid of binoculars where appropriate. Foundations and concealed parts were not exposed or inspected.

Windows, External Doors and Joinery	The windows predominantly comprise uPVC double glazed units together with some timber framed double glazed Velux windows. The front entrance doors are of uPVC type. The external roofline fasciaboards are formed in timber.
	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.

External Decorations	External decorations comprise painted finishes.
	Visually inspected.

Conservatories / Porches	There is a single storey front porch projection. The outer walls are of roughcasted block construction under a lean-to slate clad roof.
	There is a side conservatory projection forming part of the subjects. The base walls are of roughcasted block construction under uPVC double glazed windows. The roof is clad with polycarbonate sheeting. Visually inspected.

Communal Areas	None.

Garages and Permanent Outbuildings

There are a significant amount of substantial outbuildings pertaining to the property. There is a substantial attached store/workshop comprising rendered stone walls under a corrugated iron clad roof.

Within the de-crofted section of ground immediately surrounding the dwelling house there are two profile metal sheds/stores directly to the rear of the dwelling. In addition there are also a significant amount of various sheds/stores to the east of the site.

There are two large agricultural sheds/stores of steel frame construction clad with profile metal sheeting on the croft land to the rear. In addition there is also a stable block comprising brick/block walls under a profile metal clad roof together with various other stores/sheds/

Visually inspected.

Outside Areas and Boundaries

We understand from information provided that the total site area extends to approximately 7.9 acres or thereby. We would however emphasise that there were no site measurements undertaken and we have relied upon the information provided. It is understood that the immediate are of grounds surrounding the dwelling house has been de-crofted with the remainder including the land on which a number of outbuildings are situated is designated as croft land. The croft land itself is presently used for rough grazing purposes and is separated into four individual paddocks. The boundaries where seen predominantly comprises post and wire fencing together with some stone and block walling.

There are concrete access ramps to the front.

Access to the subjects is via what is understood to be an adopted road subsequently leading to private off street car parking areas.

We would emphasise that our inspection of the outside areas was greatly restricted due to the presence of snow.

Visually inspected.

Ceilings

The ceilings are plasterboard lined.

Visually inspected from floor level.

Internal Walls The internal walls are plasterboard lined. Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.

Floors Including Sub-Floors

The flooring at ground floor level is of solid concrete construction whilst the first floor is of suspended timber type. We would however emphasise that our inspection of floor surface areas was greatly restricted due to the presence of fitted floor coverings and furnishings.

Given the nature of construction there was no sub floor areas available for inspection.

Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.

Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so , and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.

Internal Joinery and Kitchen Fittings

The internal skirtings and architraves are of painted timber finish whilst internal doors are of timber and timber/glazed type.

The kitchen comprises a range of wall mounted cabinets and worktop surfaces.

There is a timber staircase connecting the ground and first floors.

Built-in cupboards were looked into but no stored items were moved.

Kitchen units were visually inspected excluding appliances.

Chimney Breasts and Fireplaces

We understand that the former fireplaces within the property are boarded over and no longer in use.

There is an electrical fireplace within the living room.

Visually inspected. No testing of the flues or fittings was carried out.

Internal Decorations	Internal decorations comprise wallpaper and painted finishes.
	Visually inspected.

Cellars	N/A

The electrical installation comprises 13 amp power points whilst the cable where visible is of pvc clad type. The electrical consumer unit and meter is contained in a high level cupboard within the ground floor inner hall. Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards.

Gas	N/A

Water, Plumbing and Bathroom Fittings

We understand that water is via mains supply.

The main shower room is of wet room style comprising a WC, wash hand basin and shower. There is an en suite bathroom off the main ground floor bedroom comprising a WC, wash hand basin and corner bath.

There is an en suite WC off a first floor bedroom.

Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.

It should be appreciated that concealed areas beneath and around baths and shower trays could not be inspected. Water spillage in these areas can result in dampness/decay and no comment can be made on inaccessible areas. Waterproof seals in sanitary areas should be checked and maintained on a regular basis.

Heating and Hot Water

Fixed central heating is provided by a recently installed external oil fired boiler which is located at the rear elevation and this serves water filled radiators throughout. This also provides for domestic hot water on demand.

Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances.

Drainage

We understand that drainage is to a private septic tank which we have been informed is located within the immediate garden grounds.

Drainage covers etc were not lifted.

Neither drains nor drainage systems were tested.

Fire, Smoke and Burglar Alarms

There does not appear to be a compliant smoke and heat alarm system within the property.

Visually inspected.

No tests whatsoever were carried out to the system or appliances.

New smoke alarm standards were introduced in Scotland in February 2022 and it is likely that some properties may require additional works to meet these standards. In instances where alarms are in place, no tests whatsoever have been carried out and we cannot confirm if the system complies with the most recent regulations. Any potential purchaser should satisfy themselves as to whether the current system meets with regulations or otherwise.

Additional limits to Inspection

At the date of inspection the property was occupied and furnished whilst the floors were covered.

There was no access gained to any sub floor areas.

Not all windows and doors were tested during the course of our inspection.

We would emphasise that a limited inspection only of the garden grounds/overall land was undertaken.

A limited inspection only was undertaken of the outbuildings.

It is outwith the scope of this inspection to determine whether or not asbestos based products are present within the property. Asbestos was widely used in the building industry until around 1999, when it became a banned substance. If you have any concerns you should engage the services of a qualified asbestos surveyor.

Insulation has been laid over the roof joists and accordingly a head and shoulders inspection of the roof space was possible only.

We would emphasise that our inspection of the roof elevations and outside areas was greatly restricted due to the presence of snow.

No inspection for Japanese Knotweed was carried out and unless otherwise stated for the purpose of this report, it is assumed that there is no Japanese Knotweed within the boundaries of the property or neighbouring properties.

It should be appreciated that the Home Report inspection is a non-disruptive visual inspection of the property as at the date of inspection and that we are unable to inspect parts of the property which are concealed or covered by floor coverings or contents in place at that time. Once vacant, defects may be apparent that could not be detected during our survey. Changing weather conditions can also affect aspects of the property which would not be apparent at the time of inspection.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

	Structural Movement
Repair Category	1
Notes	There is evidence of settlement in the building but this is not inconsistent with a property of this age and type and on the basis of a single inspection appears to be longstanding.

Dampness, Rot and Infestation
2
During the course of inspection there was some evidence of localised woodworm infestation noted to some internal timbers. There was some localised high moisture meter readings obtained to wall linings at entrance doors. It is recommended that a reputable timber/damp specialist firm be employed to carry out an inspection of the subjects and thereafter implement all necessary remedial works under cover of long term guarantee.

	Chimney Stacks
Repair Category	2

Notes	Weathering was noted to the chimney stacks. It should appreciated that they are of	
	an age where on-going maintenance will be required, particularly to flashing details	
	to ensure water tightness.	

oofing including Roof Space
ne roof covering is now of an age where ongoing maintenance will be required and would be prudent to seek the advice of a roofing contractor to comment on its urrent condition and expected lifespan. Ye would emphasise that our inspection of the roof elevations was greatly restricted use to the presence of snow.
ne w ur 'e

	Rainwater Fittings
Repair Category	2
Notes	All debris/vegetation should be removed from the rainwater fittings. Attention is required to areas of the rainwater goods system where deterioration has occurred.

	Main Walls
Repair Category	2
Notes	The stonework is weathered and attention is required to pointing. Repairs in this regard should be envisaged as part of an ongoing maintenance programme. Some cracking and localised damage was noted to the external rendering.

	Windows, External Doors and Joinery
Repair Category	1

Notes	Windows can be problematic and over time the operation of the windows can be
110100	· · ·
	affected and opening mechanisms damaged. It is therefore likely that maintenance/
	repair will be required as part of an ongoing maintenance programme.
	The windows have been upgraded in the past and were found to function adequately
	where tested at random although are of an age now where ongoing maintenance will
	be required to ensure they are kept in satisfactory condition.

	External Decorations
Repair Category	1
Notes	The external decorations are generally in fair order. Regular repainting will be required if these areas are to be maintained in satisfactory condition.

	Conservatories / Porches
Repair Category	2
Notes	Whilst the external Conservatory and porch areas appeared in generally fair condition consistent with age, regular maintenance will be required to maintain in satisfactory condition.
	Internally there was some evidence of staining noted to wall linings. Further investigation should be undertaken in this regard.

	Communal Areas
Repair Category	N/A
Notes	N/A

Garages and Permanent Outbuildings

Repair Category	2
Notes	The modern profiled metal outbuildings generally appeared in fair condition consistent with age and usage.
	Some of the outbuilding structures require ongoing maintenance and repairs.

	Outside Areas and Boundaries
Repair Category	2
Notes	You should verify with your conveyancer the extent of the boundaries attaching to the property.
	Outside areas will require ongoing repairs and maintenance.
	Boundaries/retaining walls will require repairs and maintenance although we would note that repairs/replacement to the post and wire fencing was recently undertaken.

	Ceilings
Repair Category	1
Notes	Within the limits of our inspection these generally appeared in fair condition consistent with age. During redecoration some plaster filling/repair may be required.

	Internal Walls
Repair Category	1
Notes	Within the limits of our inspection these generally appeared in fair condition consistent with age. During redecoration some plaster filling/repair may be required.

	Floors including Sub-Floors
Repair Category	1
Notes	No significant defects noted within the limitations of the inspection. No access to the sub-floor chamber was possible at the time of our visit to the property. Within the limitations of our inspection there was no indication to suggest significant defects in this area. It will, however be appreciated that the area was not inspected and therefore no guarantees can be provided in this regard.

	Internal Joinery and Kitchen Fittings
Repair Category	2
Notes	The internal joinery is showing some signs of wear and tear and upgrading during routine decoration is thought necessary.
	The kitchen fittings are generally in adequate condition for their age and type.
	Internal doors are ill fitting and should be adjusted.

	Chimney Breasts and Fireplaces
Repair Category	2
Notes	All original fireplaces have been removed/blocked and we assume adequately vented.

	Internal Decorations
Repair Category	2
Notes	The property would benefit from some redecoration works.

	Cellars
Repair Category	N/A
Notes	N/A

	Electricity
Repair Category	1
Notes	The electrical system within the property appeared of modern design, there being a circuit breaker type distribution board. It should be emphasised that the system was not tested at the time of our inspection. The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every ten years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

	Gas
Repair Category	N/A
Notes	N/A

	Water, Plumbing and Bathroom Fittings
Repair Category	2
Notes	The plumbing and fittings appear of copper/pvc piping where seen and appeared in serviceable condition but was not tested.
	The sanitary fittings appeared in fair order consistent with age.
	Some localised damage was noted to the side bath panel within the en suite.

	Heating and Hot Water
Repair Category	1
Notes	An oil fired central heating system has recently been installed. This will require ongoing and regular servicing.

	Drainage
Repair Category	1
Notes	Drainage, we understand is to an exclusive septic tank which we understand lies within the feu. This was not checked or tested. It should be ensured that appropriate registration documents are available.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility Information

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1.	Which floor is the living accommodation on?	Groui	nd & First		
2.	Are there three steps or fewer to a main entrance to a property?	Yes	х	No	
3.	Is there a lift to the main entrance door of the property?	Yes		No	х
4.	Are all door openings greater than 750mm?	Yes		No	х
5.	Is there a toilet on the same level as the living room and kitchen?	Yes	х	No	
6.	Is there a toilet on the same level as a bedroom?	Yes	х	No	
7.	Are all rooms on the same level with no internal steps or stairs?	Yes		No	х
8.	Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	х	No	

4. Valuation and Conveyance Issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated cost for insurance purposes.

Matters for a Solicitor or Licensed Conveyancer

The valuation is made on the assumption that any alterations that may have been carried out to the property satisfy all relevant legislation and have full certification where appropriate. While not necessarily an exhaustive list, alterations noted at the time of our inspection include the full refurbishment of the property circa 2005 and the construction of a number of significant outbuildings.

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute Ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds.

We would recommend that the full extent of grounds pertaining to the property be confirmed by reference to the title.

We understand that the ground on which the main dwelling house is situated together with some of the outbuildings has been de-crofted. However the vast majority of the land is understood to be under crofting tenure. Any prospective purchasers are advised to obtain full details from the Crofters Commission.

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

It is recommended that where repairs, defects or maintenance items have been identified, particularly categorised as a 2 or 3, interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase.

Estimated Reinstatement Cost for Insurance Purposes

£650,000

It is assumed that insurance cover is obtainable on normal terms. The guidance figure is the estimate of costs for reinstating the subjects as at the date of inspection based on information provided by the Building Cost Information Service (BCIS). It is recommended that this figure is kept under regular review to ensure that you have adequate insurance cover. We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than £650,000 (SIX HUNDRED AND FIFTY THOUSAND POUNDS)

Valuation and Market Comments

£435,000

Market Value assuming vacant possession is £435,000 (FOUR HUNDRED AND THIRTY FIVE THOUSAND POUNDS STERLING)

Our valuation reflects current market conditions relating to this area. We would assume that current trends will prevail at the ultimate date of disposal with no adverse or onerous matters being introduced into the market during the intervening period which would have a detrimental effect on price.

TERMS AND CONDITIONS OF SINGLE SURVEY GENERAL

1.1 The Surveyors

The Seller has engaged the Surveyors to provide the Report and a Generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited energy company.

The Surveyors are authorised to provide a transcript or retype of the Generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by brokers and lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the Generic Mortgage Valuation Report and the Report. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the Generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and Generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors are required to amend the valuation in consequence of such information, they will issue an amended Report and Generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and Generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon residential property. *

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's agent or relative to the Property, they will be obliged to indicate this in the adjacent box. No

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

* Which shall be in accordance with the current RICS Appraisal and Valuation Standards (The Red Book) and RICS Rules of Conduct.

1.2 The Report

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to the 1st of December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Report is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Report may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective Purchasers and the Purchaser and their respective professional advisors without the prior written consent of the Surveyors.

1.3 Liability

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and is prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would be (or, as the case might be, would have been) disclosed and delivered to:

- the Seller
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisors of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

Graham + Sibbald's total liability to the Client (and any third party relying upon this report) under this Agreement (including liability in contract, tort (including negligence), breach of statutory duty, or otherwise) shall be limited to the lower of the following: a) 25% of the valuation or b) £250,000.

1.4 Generic Mortgage Valuation Report

The Surveyors undertake to the Seller that they will prepare a Generic Mortgage Valuation Report, which will be issued along with the Report. It is the responsibility of the Seller to ensure that the Generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 Transcript Mortgage Valuation for Lending Purposes

The Surveyors undertake that on being asked to do so by a prospective Purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. ** The Transcript Mortgage Valuation Report for Lending Purposes will be prepared from information contained in the Report and the Generic Mortgage Valuation Report.

** Which shall be in accordance with the current RICS Appraisal and Valuation Standards (The Red Book) and RICS Rules of Conduct.

1.6 Intellectual Property

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 Payment

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports, including replacement home reports.

1.8 Cancellation

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the Property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the Property, the Surveyor concludes that the Property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the following paragraph of this section.

In the case of cancellation by the Seller, for whatsoever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

If our account details change, we will notify these to you by letter or face to face and never by email.

1.9 Precedence

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 Definitions

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a Surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is the estimated amount for which the Property should exchange, on the date of valuation, between a willing seller and a willing buyer in an arm's length transaction after proper marketing where the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in Part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property;
- the "Surveyors" are Graham + Sibbald LLP, a limited liability partnership incorporated in Scotland (Registered Number SO307130) and having its
 registered office address at Seabraes House, 18 Greenmarket, Dundee, DD1 4QB, of which the Surveyor is an employee, director or member (unless
 the Surveyor is not an employee, director or member, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report;
 and

- the "Energy Report" is the advice given by the accredited energy company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.
- "Data Protection Legislation" means the UK Data Protection Legislation and any other European Union legislation relating to personal data and all other legislation and regulatory requirements in force from time to time which apply to a party relating to the use of personal data (including, without limitation, the privacy of electronic communications).
- "UK Data Protection Legislation" means all applicable data protection and privacy legislation in force from time to time in the UK including the UK GDPR; the Data Protection Act 2018; the Privacy and Electronic Communications Directive 2002/58/EC (as updated by Directive 2009/136/EC) and the Privacy and Electronic Communications Regulations 2003 (SI 2003/2426) as amended.
- "UK GDPR" has the meaning given to it in section 3(10) (as supplemented by section 205(4)) of the Data Protection Act 2018.

DESCRIPTION OF THE REPORT

2.1 The Service

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by statute and this is in the format of the accredited energy company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 The Inspection

The inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the Property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the Property.

The inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the Report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Report of Property that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a register of asbestos and effective management plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 The Report

The Report will be prepared by the Surveyor who carried out the Property inspection and will describe various aspects of the Property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the Property will be concise and will be restricted to matters that could have a material affect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the Property is free of any other minor defects.

Throughout the Report the following repair categories will be used to give an overall opinion of the state of repair and condition of the Property:

2.3.1 Category 3:

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the Property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2.3.2 Category 2:

Repairs or replacement requiring future attention, but estimates are still advised.

2.3.3 Category 1:

No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the Property. This is particularly true during slow market conditions when the effect can be considerable. Parts of the Property which cannot be seen or accessed will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors

2.4 Services

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 Accessibility

A section is included to help identify the basic information interested parties need to know to decide whether to view a Property.

2.6 Energy Report

A section is included that makes provision for an Energy Report, relative to the Property. The Surveyor will collect physical data from the Property and provide such data in a format required by an accredited energy company. The Surveyor cannot of course accept liability for any advice given by the energy company.

2.7 Valuation & Conveyancer Issues

The last section of the Report contains matters considered relevant to the conveyancer (solicitor). It also contains the Surveyor's opinion both of the market value of the Property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation within a willing buyer and willing seller in an arms-length transaction after proper marketing wherein the parties have each acted knowledgably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of uninspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities:
- There are no particularly troublesome or unusual legal restrictions.
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a re-inspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

It is assumed that any relevant Local Authority consents, warrants and completion certificates have been obtained where construction or alteration works have been undertaken.

This agreement and any dispute or claim arising out of or in connection with its subject matter shall be governed by and construed in accordance with the laws of Scotland, and the Scotlish Courts will have exclusive jurisdiction to hear such claims.

DATA PROTECTION

Graham + Sibbald and the Client each undertake that:

- (a) they shall comply with all applicable requirements of the Data Protection Legislation, including without limitation any obligations relating to the rights of a data subject and the reporting of personal data breaches (all as defined in the UK GDPR); and
- (b) not do or omit to do anything which puts any other party to the Agreement in breach of the Data Protection Legislation.

Without prejudice to the generality of this clause, you shall ensure that you have all necessary appropriate consents and notices in place to enable lawful transfer of the personal data to Graham + Sibbald for the duration and purposes of this Agreement. You shall have liability for and shall indemnify Graham + Sibbald for any loss, liability, costs (including legal costs), damages, or expenses resulting from any breach by you of the Data Protection Legislation. For further information regarding how Graham + Sibbald processes personal data in relation to this Agreement, please see Graham + Sibbald's privacy notice on their website

Energy Performance Certificate (EPC)

Dwellings

Scotland

LOCHVIEW, KNOCKFARREL, DINGWALL, IV15 9TQ

Dwelling type: Detached house
Date of assessment: 07 January 2025
Date of certificate: 09 January 2025

Total floor area: 122 m²

Primary Energy Indicator: 195 kWh/m²/year

Reference number: 0235-1015-2209-4565-1204 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

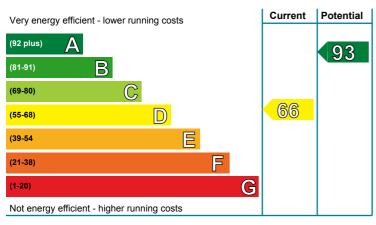

Main heating and fuel: Boiler and radiators, oil

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,095	See your recommendations
Over 3 years you could save*	£144	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

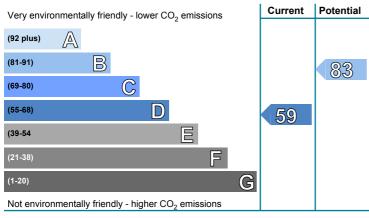

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (66)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Solar water heating	£4,000 - £6,000	£144.00
2 Solar photovoltaic (PV) panels	£3,500 - £5,500	£1131.00
3 Wind turbine	£15,000 - £25,000	£2595.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, insulated (assumed)	****	★★★ ☆
Roof	Pitched, 200 mm loft insulation Roof room(s), ceiling insulated	**** ****	**** ****
Floor	Solid, insulated (assumed)	_	_
Windows	Fully double glazed	****	★★★ ☆
Main heating	Boiler and radiators, oil	***	★★★☆☆
Main heating controls	Programmer, room thermostat and TRVs	****	★★★ ☆
Secondary heating	None	_	_
Hot water	From main system	***	***
Lighting	Low energy lighting in 80% of fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 51 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 6.2 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.9 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£2,925 over 3 years	£2,925 over 3 years	
Hot water	£774 over 3 years	£630 over 3 years	You could
Lighting	£396 over 3 years	£396 over 3 years	save £144
Totals	£4,095	£3,951	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded massives	Indiantive and	Typical saving	Rating after improvement	
Recommended measures	Indicative cost	per year	Energy	Environment
1 Solar water heating	£4,000 - £6,000	£48	D 68	D 61
2 Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£377	C 76	C 69
3 Wind turbine	£15,000 - £25,000	£865	A 93	B 83

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

2 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

3 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	13,681	N/A	N/A	N/A
Water heating (kWh per year)	3,673			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Mr. Neil Cromarty Assessor's name: Assessor membership number: EES/009427 Graham & Sibbald Company name/trading name: 4 Ardross Street Address: Inverness

> IV3 5NN 01463 236977

Phone number: Email address: inverness@g-s.co.uk Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership		
	How long have you owned the pro	perty? 20 + YEARS	
2.	Council tax		
	Which Council Tax band is your pro	operty in? (Please tick one)	
3.	Parking		
	What are the arrangements for pa (Please tick all that apply)	rking at your property?	
	Garage		
	Allocated parking space		
	Driveway		
	Shared parking		
	On street		
	Resident permit		
	Metered parking		
	Other (please specify):		
4.	Conservation area		
	Is your property in a designated C of special architectural or historica appearance of which it is desirable	I interest, the character or	☐ Yes ☐ No ☑ Don't know

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	☐ Yes ☑ No
6.	Alterations/additions/extensions	
а.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	☑Yes ☐ No
	If you have answered yes, please describe below the changes which you have made: Excessed to propose	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	☑ Yes □ No
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	☐ Yes ☑ No
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	☐ Yes ☑ No
	(ii) Did this work involve any changes to the window or door openings?	☐ Yes ☑ No
	(iii) Please describe the changes made to the windows doors, or patic approximate dates when the work was completed): NA	o doors (with

7.	Central heating	grand of
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom). If you have answered yes or partial — what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air). If you have answered yes, please answer the three questions below:	Yes No Partial
	(i) When was your central heating system or partial central heatinstalled? When Mind in	ing system
	(ii) Do you have a maintenance contract for the central heating system?If you have answered yes, please give details of the company with which you have a maintenance contract:	☐ Yes ☑ No
	(iii) When was your maintenance agreement last renewed? (Pleas month and year).	e provide the
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	☐ Yes ☑•Ño
9.	Issues that may have affected your property	
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim?	☐ Yes ☑ No ☐ Yes ☐ No
b.	Are you aware of the existence of asbestos in your property? If you have answered yes, please give details:	☐ Yes ☐ No

10.	Services				
a. Pl	ase tick which services are connected to your property and give details of the supplier:				
	Services	Connected	Supplier		
	Gas or liquid petroleum gas	*	×		
	Water mains or private water supply		Scotlish	NATE 12	
	Electricity		SSE		
	Mains drainage	/	PRIMATE SEL	pric	
	Telephone	*	×		
	Cable TV or satellite	/	NIA SATELLITE	71sH	
	Broadband	7	×		
b.	Is there a septic tank system at your property? If you have answered yes, please answer the two questions below:			Yes No	
	(iv) Do you have appropriate consents for the discharge from your septic tank?			Yes No Don't Know	
	(v) Do you have a maintenance contract for your septic tank? If you have answered yes, please give details of the company with which you have a maintenance contract:			☐ Yes ☑ No	

11.	Responsibilities for shared or common areas	
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area? If you have answered yes, please give details:	☐ Yes ☑ No ☐ Don't Know
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas? If you have answered yes, please give details:	☐ Yes No Not applicable
C.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	☐ Yes ☐ No
d.	Do you have the right to walk over any of your neighbours' property — for example to put out your rubbish bin or to maintain your boundaries? If you have answered yes, please give details:	☐ Yes
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries? If you have answered yes, please give details:	☐ Yes ☑ No
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.) If you have answered yes, please give details:	☐ Yes ☑ No
12.	Charges associated with your property	
а.	Is there a factor or property manager for your property? If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	☐ Yes ☑ No

с.	Is there a common buildings insurance policy? If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges? Please give details of any other charges you have to pay on a regular upkeep of common areas or repair works, for example to a residents maintenance or stair fund.	☐ Yes ☐ No ☐ Don't Know ☐ Yes ☐ No ☐ Don't Know ☐ basis for the ' association, or
13.	Specialist works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property? If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.	☐ Yes ☑ No
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property? If you have answered yes, please give details:	☐ Yes ☑ No
C.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work? If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate. Guarantees are held by:	☐ Yes ☑ No
